

Quinto drills enables manufacturing and reshaping of most common drill tips available on the market.

The package contains 4 Facettes, Cone Shaped Shell, 4 Facettes S-Gash, Cone Shaped Shell S-Gash and Flat Drill with center.

The Toogle database contains 12 samples of each drill type, starting from D2mm till D20mm. If the desired drill size is not covered by the database, the new NTTE function can be used to create a new tool in seconds.

- Automatic grinding process adaptation
- Authentic 3D tool and process visualisation
- More than 50 samples available in Toogle database
- NTTE: create new drills in seconds
