

## Quinto Inserts A08-XXX Metal Inserts

**SCHNEEBERGER**

Quinto Inserts covers the most types mentioned in DIN/ISO 1832.

Toogle contains samples of each type within database, ready to grind.

The software is based on DXF import and following tool projection in 3D. Calculation considers both shear and cutting angles of chip space and corrects the profile.

Tool programming, setup and grinding require just a few steps.

- Automatic grinding process adaptation covers most cases without further user interaction
- Simple and comprehensive programming
- *Path and Clearance Qreator* for customizing clearance angles and grinding path available throughout for advanced users
- Multiple insert samples included in database

### Specifications

- Based on ISO 1832
- Includes types C,D,T,S,V,W as well as insert drill tips
- Profile projection considers rake and shear angle
- Tool dimension considered and outlined in 3D
- Ready to grind immediately
- For office and machine versions
