

Quinto Endmills is addressing both manufacturing and resharpening of common endmills nowadays.

The package contains standard endmills with sharp corner, chamfer or corner radius, as well as radius and ballnose endmills.

The Toogle database contains more than 175 endmills starting from D2mm till D40mm, from 1 till 8 cutting edges. Left and right spiral as well as conical ones.

Built in NTTE function creates a tool, which is not covered by the database sample within seconds. Simply enter diameter, number of teeth and helix angle, and the new tool will be generated based on the samples inToogle.

- Automatic grinding process adaptation
- Authentic 3D tool and process visualisation
- More than 175 samples available in Toogle database
- NTTE: create new tools in seconds
- Add your own tool database

A01-010 [153]  
Standard

A01-100 [41]  
Radius Endmills

A01-200 [18]  
Ballnose Endmills

### Specifications

- Solid 3D tool modelling
- Automatic process attachment
- Ease of access, preview functions
- Huge number of sample tools included in database
- Ready to grind immediately
- For office and machine versions
