

Grind	ISO	Probe	Dress	Handling
Clearance	Top Down Pocket	Top Down	Top Down frozen axis Pocket	Top Down frozen axis

Quinto Woodworking Tools package is a very powerfull but comprehensive software module for profiled inserts and cutter heads.

Projection of insert profile considers it's final mounting and all clearance angles are calculated and ground based on this data.

Advanced Roughing allows to strip the material in most fastest and efficient way.

- Automatic grinding process adaptation covers most cases without further user interaction
- Simple and comprehensive programming
- Path and Clearance Qreator* for customizing clearance angles and grinding path are available throughout for advanced users
- 22 insert samples included in data base

Specifications

- Excellent package for profiled woodworking inserts
- Profile projection considering insert seating in cutter
- Huge number of sample tools included in database
- Ready to grind imediately
- For office and machine versions
- Samples based on worldwide standards
